

# Go Green with MineFleet®

## What is MineFleet®?

MineFleet is designed for commercial fleet owners and fleet management companies who want the power of advanced predictive vehicle data mining for dramatically reducing the operating costs. MineFleet offers a powerful onboard data stream mining software for modeling, benchmarking, and monitoring of vehicle health, emission, driver behavior, fuel-consumption, and fleet characteristics.

## Top Ten Reasons to use MineFleet®

1. Reduce fuel cost using smart fuel consumption analytics.
2. Advanced predictive vehicle health monitoring using data mining technology.
3. Optimize driver behavior by quantifying the effect on vehicle performance.
4. Go green by reducing emission using MineFleet Emission Analytics.
5. Advanced fleet analytics for comparing and contrasting vehicles.
6. Advanced decision support tools for trend analysis and anomaly detection.
7. Open architecture for integrating MineFleet Analytics with your application.
8. Web-service and thick client-based access to analytics.
9. MineFleet already comes built-in with several modems.
10. Affordable solution with quick return on investment.

## True Emissions Analysis

MineFleet Onboard directly monitors vehicle subsystems to provide an empirical and authentic analysis of an engine's emissions output. Subsystems monitored include: EGR system, evaporative system, fuel system, misfires, oxygen sensor heater, catalyst and more. The resulting analysis provides a quantitative assessment of vehicle emissions, including CO<sub>2</sub>, CO, NO<sub>x</sub> and hydrocarbons.

## MineFleet Green Scoring™

Organizations can measure their fleet's emissions and carbon footprint using MineFleet Green Scoring methodology similar to the EPA SmartWay scoring system for vehicles and fleets to demonstrate their commitment to the environment and efforts for building green fleet.

## Continuous Emissions Testing

MineFleet Onboard software automatically analyzes emissions data and performs real-time analysis onboard the vehicle. The results are available through the MineFleet Web-Services. Automated emails can be generated if any of the emissions-tests fails. Use MineFleet Emissions Reports to get a complete emissions-evaluation of your fleet on a regular basis.

## Forget Emissions Test Centers and Get Grant Money

Got MineFleet Onboard? You do not need to send your vehicles to smog test center anymore in California. Save money and time by adopting MineFleet continuous monitoring service. Several government and non-government programs are offering funds to reduce emission and make your fleets green. Contact Agnik or any MineFleet distributor for more information.
